

SURFACE PAVE-RA-4

Surfaces that look great and last great

**An Attractive & Durable
Indoor Floor Surface
Coating for Increased
Safety.**

Surface Pave-RA-4 is a high quality Polyurea coating for interior applications such as car park surfaces and pedestrian walkways. The colour steadfast, seamless finish is applied over Asphalt or Concrete surfaces to provide an anti-skid rating of 64 BPN (British Pendulum skid resistance Number). The toughened glass crystal aggregate is produced with rounded edge to enhance the safety of floor users and it comes in a variety of grade sizes to suit any application. Glass crystals are naturally harder than metal, making the system very hard-wearing and durable - perfect for multiple applications. The reflective nature of crystal means the color will remain vibrant even under weathering and aging conditions which causing wear to the surface.

Key Features

- Slip resistant
- High durability
- Semi flexible
- Color steadfast
- UV stable
- Greatly reduced tyre noise
- Cost effective

Applications

- Pavements & Walkways
- Airports
- Industrial flooring
- Car parks
- Shopping Malls
- Ramps

Surface Pave-RA-4 Product Information

- Pave-RA-4 is a solvent based 2-pack Polyurea
- Pave-RA-4 uses recycled glass aggregates
- The hard wearing surface is excellent for high traffic areas.
- Pave-RA-4 is not an Epoxy coating - Polyureas are typically more flexible than epoxy coatings and better suit surfaces where movement will occur.
- Pave-RA-4 is a Low sheen / matte finish - this is a key safety feature in traffic and car park environments, especially in the wet.
- Every Pave-RA-4 coating system is specified to suit your application. It is much more than just a paint.
- Surface primers and a series of base layers form part of every Pave-RA-4 system to ensure its success
- Pave-RA-4 comes in a standard colour range. It can also be mixed in any International Standard RAL colour. This may depend on volumes as it is done at the time of manufacture.

Typical applications for Surface Pave-RA-4

Standard Colours

Red, Burgundy, Brilliant Blue, Deep Green, White
Apple Green, Dark Grey, Light Grey, Turbo Yellow

Custom colours are also available

Case Study - Warehouse Safety Crossings

Scope - Replace the worn pedestrian crossings in a busy DC to improve safety & awareness.

Steps taken

1, Diamond grind off all existing coatings

2, Apply base primer coating

3, Apply Re-surfacer cementitious layer

4, Apply Moisture barrier layer

5, Apply first coat Grey Pave-RA-4 followed by a top coat once cured

6, Apply 2 coats to the white pedestrian bars

7, Remove masking and apply 1 coat of clear sealer for additional protection.

Result - Highly visible non-slip enhanced safety crossings for staff and visitors.
