

SURFACE SPU® Perfect Bounce

Surfaces that look great and last great

**An Innovation based on
understanding Sporting
Performance.**

The SPU® Perfect Bounce system is formulated utilizing the highest quality acrylic and resin layers producing a resilient sub-surface with shock absorbing qualities. Its cushion effect reduces player fatigue and provides a nice playing surface for all ages.

The surface is a combination of layers starting with a thick polyurethane synthetic base and includes a robust top layer made up of a resilient modified acrylic deck coat and a hard wearing acrylic top coat. The finished acrylic surface has the excellent playing characteristics of a tennis court surface which responds perfectly to all tennis strokes, ball bounce and speed.

SPU® Perfect Bounce is a seamless, uniform international quality sports surface with excellent elasticity - guaranteeing a long lasting professional sports surface with low maintenance.

All installations of our coatings system are strictly carried out only by manufacturer approved applicators to ensure high quality and standards.

Key Features

- Stable, consistent rebounds
- Effective shock absorption
- Outstanding skid resistance
- Excellent direction control
- Reduced player fatigue
- Seamless coating

Applications

- Basketball Courts
- Tennis Courts
- Badminton Courts
- Volleyball Courts
(All Weather)

There are many uses for SPU® Perfect Bounce

High Performance

The elastic underlay prevents any prolonged vertical deformation and provides the necessary cushion effect for players. The backbone of SPU® Perfect Bounce is the firm deck polymer which ensures excellent ball bounce and enhances the wearing ability of the surface.

A breakdown of the 6 coat system can be seen in the illustration below.

SPU® Perfect Bounce has achieved ITF certificate for speeds 2 & 5. In 2010, 2011 & 2012 SPU® Perfect Bounce has been used for the ITF Tour in China and is recognized for its performance.

If you are looking for a quality low cost solution, ask about our SURFACE TL2000 as an alternative Acrylic System. TL2000 is a low maintenance 4 coat system with many excellent characteristics.
